

# List of API Endpoints

In this project, Api endpoints are considered for different levels of authorization and different features. This is so that regular users cannot make the same requests as an admin user. Also to enable features that users can use.

The required API endpoints for this project are:

1. Admin
2. Users
3. Trainers
4. Workouts
5. Comments
6. Likes / Saves
7. Fitness Journey Progress
8. Discover Trainers
9. Followers / Following
10. Feeds
